EXPERIENCE

Yellow.ai **SDE-3** — Feb 2024 – Present

- Built Nexus, an agentic AI interface for enterprises to build agents, query analytics, and manage operations via natural language. Achieved 98.9% task success rate across 750+ customer AI agents.
- Built Forge, an internal dashboard for LLM cost monitoring, session debugging, user feedback, and rate limits. Cut debugging time from ~45 min to under 2 min.
- Built Analyze, a self-learning tool that reviews agent conversations, creates KB articles, and trains AI agents. Resulting in a 30% reduction in escalated tickets.
- Built Search SDK, a plug-and-play website search widget. Logitech sees 16M+ monthly requests with zero reported issues.

Yellow.ai **SDE-2** — Dec 2021 – Jan 2024

- Optimized chat widget to load 30% less JavaScript on initial page load, saving end-user bandwidth.
- Improved chat widget accessibility to comply with WCAG Level A and AA guidelines.
- Created an i18n module supporting 15+ languages in the chat widget UI.
- Built debug log feature improving bot developer productivity by 5x via in-studio flow debugging.
- Improved stability of legacy codebase serving 300k daily active users and 1B+ messages monthly.

Softway **UX Engineer** — Jul 2021 – Dec 2021

- Designed and built NPS survey tool for Culture+ to evaluate employee and leadership behavior changes.
- Built NPS-based measurement tool used by Culture Advisors for Fortune 500 cultural impact tracking.
- Transitioned Culture+ Counter from prototype to live product in two months.

Betsol **Software Engineer** — Jan 2021 – Jul 2021

- Built dashboard visualizing critical metrics and real-time issues for SlingTV, replacing manual metadata crawling for Dev & QA teams.
- Designed stakeholder reporting tool delivering personalized Sling app performance metrics via email.

Betsol **Associate Software Engineer** — Jul 2019 – Jan 2021

- Optimized Leto (DevOps tool) performance by 3.7x — Lightspeed score from 26 to 96.
- Led a 4-day JavaScript/React.js workshop enabling team migration from legacy codebase.
- Redesigned auth with JWT + OAuth2.0, preventing XSS attacks.

EDUCATION

Visvesvaraya Technological University — Jun 2015 – Jun 2019
B.E. Computer Science • RNS Institute of Technology • CGPA: 8.0/10

The Interaction Design Foundation — Jan 2019 – Dec 2019
User Experience Design

PROJECTS

Homero **Fullstack Designer** — Apr 2019 – Present

- Developed a booking app helping New Yorkers complete house-cleaning reservations in under 2 minutes.
- Currently making over 200k+ USD in ARR, I designed and built the app and dashboard experience end to end.
